About Me

DevOps Engineer specializing in software automation, Go powertool development, and cloud infrastructure. Passionate about system design and building reliable, observable systems. Have a soft spot for distributed systems.

Skills

Languages Python, Go, Bash/Shell
Infrastructure & Cloud Kubernetes, Docker, Linux, AWS, Terraform
Observability Prometheus, Grafana, Loki, Mimir
DevOps & CI/CD GitHub Actions, GitLab Pipelines, Ansible, Jenkins Pipelines

Professional Experience

Zucchetti **06.2024 — Present**
DevOps Engineer

- Managed and maintained the internal **VMware vSphere** infrastructure, handling machine provisioning and service deployment
- Designed and implemented **CI/CD pipelines**, streamlining workflows and eliminating manual operational overhead
- Built powertools in **Go** for internal use, improving developers' experience
- Led the migration from a monolithic database to a self-hosted, containerized **PostgreSQL** distributed system, while providing a middleware service for internal and customer use
- Designed and implemented **agentic workflows** and tool harnesses for automated codebase documentation

Keypartner **07.2022 — 06.2024**
DevOps Engineer

- Designed and built a production-ready **Kubernetes** platform based on *RKE2* and *Rancher* from SUSE, for the *ELT Group* (Italian defense sector), handling security & compliance requirements
- Guaranteed high availability across Kubernetes major version upgrades, automated service provisioning, and observability stack
- Collaborated with development teams to build automated **GitLab Pipelines**, managing the full SDLC and deploying via **ArgoCD** GitOps workflows
- Taught a hands-on cloud and containers workshop for Italian public sector bodies, including *Camera dei Deputati* and *COR*

Education

Sapienza University of Rome | Computer Science **2020 — 2022**
Master's Degree in Computer Science

Sapienza University of Rome | Informatica **2016 — 2020**
Bachelor's Degree in Computer Science (Informatica)
